

Simple document

I'm an R Markdown document!

Section 1

Here's a **code chunk** that samples from a *normal distribution*:

```
samp = rnorm(100)
length(samp)
```

```
## [1] 100
```

```
mean(samp)
```

```
## [1] -0.1214794
```

Section 2

I can take the mean of the sample, too! The mean is -0.1214794.
